# GENERAL INFO

## Description:

ULTRASTONE is a flexible veneer laminated to a fiberglass and polyester resin substrate, made of a thin layer of real stone: Slate, Quartzite, Sandstone, Marble.

This innovative product can be applied over concrete, ceramic, wood, metal, plywood, fiberglass, backer board, tile, dry wall, MDF, HPL, cabinetry and many other surfaces.

Natural Stone Veneer has been tested as a covering veneer in many different environments, proving to be an excellent material when a real stone finish is desired, but heavy solid stone might not be practical. ULTRASTONE is suitable for both, indoors and outdoors.

## Suggested applications:

Interiors and exteriors, walls, furniture, kitchen or closet cabinets, doors, ceilings, limited weight applications in boats, airplanes, cars, elevators, round columns, lobbies, and any place your imagination can think of.

## Installation tips:

Application of Ultrastone can be performed using basic tools, traditionally used to install tiles.

Cutting: Cutting straight lines and curves is best done using long nosed tin snips. Ultrastone can also be cut with a metal shear, wet saw, or table saw with carbide or diamond blade.

## Sealers:

It is best to pre-seal Ultrastone sheets prior to the installation. This protects and seals the face from adhesives and grout during application and handling. Ultrastone can be sealed with the same sealers used for stone.

# GENERAL INFO

## Adhesives:

Use the proper adhesive following the manufacturer's instructions according to the substrate to be applied. Examples: Acrylic copolymer, Polyurethane wood glues, PU construction grade adhesives, highly modified thin-set, Epoxy, construction grade multi-purpose adhesive, latex modified thin set.

## Colors:

Since Ultrastone is a product of nature, color and texture variances are inherent to each particular stone and part of the natural beauty of quarried materials.

Ultrastone can't be guaranteed to match dye-lot to dye-lot. We present 15 colors out of a great range of more than 22 available. For larger projects we can supply with a time frame a matching lot from same quarrying to facilitate the installation.

## Sizes:

2 x 4' | 1/16" - 1/8"

MAXI: 4 x 8' (selected colors) | 1/16" - 1/8"

Translucent sheets of 2 x 4' LUX (selected colors) | 1/8" - 1/4"

## LUX:

The LUX series is a veneer with an acrylic translucent backing which allows the light go through from the back for an impressive and unique effect. This presentation is more rigid than the other, for easier framing and installation. Ideal to be used in accent walls with a backlight that will enhance and produce indirect light through the natural stone structure and color.
