

Fluted Bamboo Fiber with PVC Film

Innovative, new wall application.
Specially designed with high quality pvc film.
Made from fire, stain and water resistant materials.
Creating a contemporary or modern look.
Easy and fast to install. No need for special preparation of surface.
Light, and economic.
Each piece interlocks with each other to create a seamless joint.

Birch

Mahogany

Fluted Panels

Made of bamboo and wood fiber mixed with resins. Large size panels and seamless joints make this panel the ideal to cover walls and ceilings. Light weight, easy to cut and install. The hollow structure gives additional strength and reduces weight.

All panels are covered with a resistant film. Many colors, textures, designs are available.

Arabescato

Current color selection in stock.

Create amazing combinations using the fluted panel.
Many colors and textures to choose from for special orders and projects.

Uses:

Residential and commercial indoors only.

Living rooms, TV wall, bedrooms, lobby, hotel, retail stores, restaurants, fireplace, and more.

Combine with other wall finishes.

Color and textures options on special order only

Specifications:

Size of panel: 6.5 x110”

Thickness: 3/4”

Water Resistant

Fire Resistant

Uses:

Indoor applications. Walls, ceilings, family room, bedrooms, fireplace, and more.

Commercial or residential.

Installation:

Panels are solid and strong due to the composition of the materials used to produce these panels.

Can be installed over a flat unfinished wall. No need for major repairs of existing wall.

- 1- Measure and cut slabs accordingly to the wall.
- 2- Cut any openings for electric, water fixtures or other openings.
- 3- Apply PU structural glue on the back of panel evenly along the surface. Attach to wall.
- 4- Place special clips and screw to wall for additional adherence.

Maintenance:

Use a damp cloth or a mild soap as necessary.
